LEARNING TO VALUE EVALUATION IN LANGUAGE TEACHING

John M. Norris, University of Hawai`i at Mānoa
The Japan Association for Language Teaching, Annual Conference
November 23, 2007

A. Dealing with change in language education

1. Concerns with the value of language teaching and learning
   - “Language crises” and the “failure” of language teaching
   - Standards, policies, and language education
   - Diverse learners, diverse needs, diverse instructional demands
   - What is the role of language teaching in the 21st century?

   ➔ Language education is undergoing fundamental and inevitable change in response to societal, intellectual, and other forces—how should language educators respond?

2. Why worry about evaluation? Determining the value of language education
   - Increasing demands from a variety of quarters to assess and evaluate
   - Implications of the accountability movement for language education
   - Widespread culture of evaluation misunderstanding and misuse
   - Impact of evaluation on language teaching, teachers, and learners???

   ➔ POTENTIAL NEGATIVES: Evaluation and related processes can exact considerable negative consequences on teaching, learning, and professional survival, if left unheeded or left to others.

   BUT... “We have a social and moral responsibility towards our students and towards society at large to state as clearly as we can what it is that we do for them and why what we do is valuable.” (Anonymous survey respondent)

   ➔ POTENTIAL POSITIVES: Evaluation and related processes can provide an effective means for dealing with change, offering empirical bases for deliberation, demanding clear thinking, sharpening our understandings of program successes and value, and empowering educators with evidence.

3. Basic premise: Evaluation as change agent

   Evaluation plays a decisive role in changes that occur in language education at micro (program-internal) and macro (institutional, societal) levels. How we act now via evaluation will condition the nature of change. By learning to see our programs through evaluation (and by enabling others to see), we can demonstrate the educational/social good that we do, reflect on exactly what that good should be, and articulate/improve our practices to ensure we continue to achieve it.

   ➔ To what extent are language teachers, programs, and the professions prepared to utilize evaluation in dealing with change?

B. Traditions, trends, and the status quo in language program evaluation

1. Our evaluation inheritance in language teaching
   - From JIJOEs to a cult(ure) of measurement

   Swender (2002): “After all, if teachers do not know how to measure what students can do with language, how will they be able to determine whether their students are measuring up to the expectations of the 21st century?” (p. 591)

2. Some current trends to evaluate in education
   - Outcomes and accreditation
   - Accountability testing
   - Received/perceived view of evaluation:

   Barrington (2003): “To design and administer (intellectually honest) assessment plans that will measure such capabilities with a dozen or more standardized ‘learning objectives’ is next to impossible” leading to “pestilent repercussions” for the truly valued learning objectives that constitute the liberal arts, in that it “discourages teaching such skills because they are difficult to measure.” (p. 31).

3. The status quo in language program evaluation?

<table>
<thead>
<tr>
<th>DOING</th>
<th>USING</th>
<th>WHY</th>
</tr>
</thead>
<tbody>
<tr>
<td>HOW</td>
<td>IMPROVEMENT</td>
<td></td>
</tr>
<tr>
<td>ACCOUNTABILITY</td>
<td>INTERNAL</td>
<td></td>
</tr>
<tr>
<td>EXTERNAL</td>
<td>ASSESSMENT</td>
<td></td>
</tr>
<tr>
<td>MEASUREMENT</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

   Feasibility? Coverage? UTILITY?

   Relevance? Buy-in? VALUE?
If evaluation is intended to support educational programs and improve student learning, in response to crises/change, how should the status quo evolve?

C. Re-envisioning evaluation in language education

1. Resolving terminological confusion

- **Measurement**: “the consistent elicitation of quantifiable indicators of well-defined constructs via tests or related observation procedures; emphasizes efficiency, objectivity, and technical aspects of construct validity”
- **Assessment**: “the systematic gathering of information about student learning in support of teaching and learning...may be direct or indirect, objective or subjective, formal or informal, standardized or idiosyncratic...provide locally useful information on learners and on learning to those individuals responsible for doing something about it”
- **Evaluation**: “the gathering of information about any of the variety of elements that constitute educational programs, for a variety of purposes that primarily include understanding, demonstrating, improving, and judging program value...brings evidence to bear on the problems of programs, but the nature of that evidence is not restricted to one particular methodology” (Norris, 2006c, p. 579)

Æ Educational program evaluation:

+ other observational methods

**Assessment**

= evidence-based problem solving

2. The nature of useful evaluations

(a) the individual intended users of evaluation participate in evaluation processes, from asking questions to designing methods to collecting data to making recommendations for change;
(b) evaluation is pursued as a process, not an end-game;
(c) sufficient time and resources are allocated and evaluation activities are feasible and focused on the problems at hand;
(d) the evaluation produces interesting, credible, and immediately relevant findings;
(e) findings are reported in a timely fashion and communicated in a way that can be readily understood and applied by intended users; and
(f) interpretations and recommendations are contextualized to the specific program setting and variables (see Patton, 1997)

Æ Emerging visions of evaluation:

“[A] process of evaluating and improving current programs, encouraging innovations, and then evaluating each innovation’s effectiveness. The key step is systematic gathering of information for sustained improvement. And always with an eye toward helping faculty or students work more effectively.” (Light, 2001, p. 224)

“Evaluation is a way of appreciating the art of teaching. Evaluation creates an awareness of the richness, the creativity, and the philosophies of the people involved.” (Cumming, 1999, p. 1)

“If evaluation in English Language Teaching is to be effective, we will see a stronger integration of evaluation within practice, as part of an individual’s professionalism, and an increase in collaborative activity where teachers (and other relevant participants) are actively engaged in the monitoring process.” (Rea-Dickins, 1994, p. 84)

Æ If evaluation is going to happen, one way or the other, and if we want it to perpetuate and extend the valued learning that occurs within language programs, how do we get there? How do we make evaluation useful?

3. How does useful evaluation happen? Realization + Proceduralization

Æ Multiple purposes: holding ourselves accountable, but also diagnosing needs, improving teaching, articulating courses, revising curriculum, illuminating degree value, developing programs, justifying expenditures, etc.

Æ Multiple methods: self-assessments, standardized assessments, performance assessments, journals, portfolios, surveys, interviews, focus groups, observations, document analyses, etc.

↑ARTICULATION & ALIGNMENT↓

Æ Procedures:

Æ Identify, involve program stakeholders and intended users
Æ Prioritize challenges, problems, evaluation questions
Æ Select methods, design instruments/procedures, gather evidence
Æ Analyze, understand, interpret evidence in situ
Æ Report findings to users, stakeholders, audiences
Æ USE findings as basis for deciding and acting
Æ Generate new priorities for evaluation
D. What does it look like? Value added by evaluation in diverse settings

1. TEACHER-LED INTERNAL EVALUATION

*English Language Institute, Teacher Induction Program*
*Q: How can teacher induction practices better prepare teaching assistants?*

<table>
<thead>
<tr>
<th>Methods</th>
<th>Transformations</th>
</tr>
</thead>
</table>
| Interviews, focus-groups, surveys of administration, and past/current/future teachers | • Produced clear induction goals  
• Improved induction processes  
• Empowered teachers to express their needs  
• Raised awareness about evaluation among teachers and administration  
• Initiated process of on-going evaluation and improvement |

“The evaluation empowered the ELI teachers, since their thoughts and ideas about teacher induction were heard and highly valued, and their suggestions taken. The fact that the evaluation focus was proposed by two teachers out of our internal concerns added to the empowerment of teachers.” (p. 28)

2. TEACHER-RESEARCHER COLLABORATION, NEEDS ANALYSIS

*University of Hawaii Japanese Program*
*Q: What do students need to learn, and how does that match our curriculum?*

<table>
<thead>
<tr>
<th>Methods</th>
<th>Transformations</th>
</tr>
</thead>
</table>
| Surveys of teacher & student views on learning needs | • Revised texts, materials development  
• Focus: speaking/culture/performance  
• Japanese use in Hawaii & abroad  
• Revised balance/pace of instruction  
• Increase in learner interest  
• Commitment by administration to ongoing assessment and development |

“Future efforts to incorporate teachers’ and students’ perceptions of students’ needs into the program will help to improve all the interconnected and dynamic components of curriculum development…” (p. 73).

3. PROGRAM-DIRECTOR INTIATIVE, STUDENT LEARNING OUTCOMES

*Stanford University Language Center*
*Q: How do we justify and perpetuate our FL programs?*

<table>
<thead>
<tr>
<th>Methods</th>
<th>Transformations</th>
</tr>
</thead>
</table>
| ACTFL-based oral proficiency assessments on completing lang. req. | • Increased $, staff, salaries  
• Increased enrollments  
• Raised institutional status  
• Silenced doubters of FL efficacy  
• Inculcated professional development disposition, process, support |

“...I believe it is the direct result of the visibility of the learner assessment program that was initiated in 1995” (p. 602).

4. EDUCATIONAL CENTER, NATIONAL INNOVATION PROJECT

*Dutch Second Language Education in Belgian Schools*
*Q: How do we train and support teachers in task-based innovation?*

<table>
<thead>
<tr>
<th>Methods</th>
<th>Transformations</th>
</tr>
</thead>
</table>
| Long-term iterative evaluation and revision cycles; training and classroom observations, teacher interviews, logs, surveys, student pre-post assessments | • Teacher development adapted from short-term transmission to long-term support models  
• Clear impediments found/removed  
• Training/support localized, individualized, coaching + materials  
• Increase in teacher agency  
• Increase in teacher/school use of TBLT  
• Increase in learner DSL proficiency higher in TBLT-intensive classes and schools |

“The results...deepen our insight in the potential and the limitations of teacher training, particularly with regard to the implementation of task-based language teaching.” (p. 218).
E. Learning to value evaluation

“Capacity for change” is exactly what program evaluation provides, if we learn to see it as a practice of our own devise, in the service of our own programmatic and professional values, and in response to the needs of students and teachers.

➔ What can we do about it? Learn to see evaluation as useful and essential:
1. Clarify roles for assessment & evaluation in language programs
2. Encourage, enable, and engage in professional development; make a professional space for evaluation in language programs
3. Generate and share examples, participate in the discourse
4. Hold evaluation accountable to language programs, teachers, learners
5. USE it or lose it…
